

Enterprise Modelling and Information Systems Architectures

International Journal of Conceptual Modeling

Focus and Scope

EMISAJ publishes thoughtful, well-developed articles on all facets of analyzing, designing, investigating, evaluating and applying conceptual models, enterprise models, enterprise and information systems architectures, corresponding modeling languages and modeling methods, and is open to submissions from all scientific disciplines and research fields. The editorial board imposes no restrictions regarding the research paradigm or research method, encourages multidisciplinary research contributions, and welcomes submissions from for-profit, nonprofit and government organizations.

The journal will adress (but will not limit itself to) the following specific areas:

- General Purpose and Domain-Specific Modeling Languages
- Modeling Methods, Metamodeling, Method Engineering
- Enterprise Architectures, Information Systems Architectures
- Ontologies and Reference Models
- Analysis Patterns, Design Patterns, Architectural Patterns
- Analysis of Conceptual Models and Modeling Languages
- Evaluation and Quality of Conceptual Models, Architectures, and Languages
- Model-Driven Development, Models@run-time, Executable Models
- Business Process Management
- Enterprise Architecture Management
- Information Systems Design and Design Methods
- Information Systems Development Methods and Tools
- Software Tools for Conceptual and Enterprise Modeling, Business Process Management and Enterprise Architecture Management
- Learning and Teaching Conceptual Modeling
- Applications of Conceptual Modeling in Organizations
- Innovative Approaches to Conceptual Modeling

Advantages of publishing in EMISAJ

- International board of renowned editors
- Short review cycles with constructive reviews
- Long manuscripts accepted for review
- Online publishing with DOI and archiving
- Indexed by DBLP, EBSCO and ESCI
- Ranked by JOURQUAL and NSD

EMISAJ is a publisher-independent journal, and is published by the German Informatics Society (GI) and is a publication of its SIG on Modeling Business Information Systems (SIG MoBIS) and its SIG on Design Methods for Information Systems (SIG EMISA)
